Dear Patient:

We are pleased to announce that The Institute for Female Pelvic Medicine is now offering a novel office-based laser therapy for the restoration of vaginal health.

Monalisa Touch[™] is designed for postmenopausal women who are suffering from changes in their vaginal health such as vaginal dryness and painful intercourse. Women experiencing side effects as a result of a hysterectomy or breast cancer treatments can also benefit from Monalisa Touch[™] laser therapy.

The Monalisa Touch[™] delivers gentle fractional CO₂ laser to the vaginal wall tissue. It restores vaginal health by generating new collagen, elastin and vascularization.

- 3 treatments <15 minutes
- In office procedure
- Requires no anesthesia
- Extremely safe
- Symptom relief after just one treatment
- No downtime
- Thousands of women successfully treated since 2012

If you are a breast cancer survivor, are peri or postmenopausal and are suffering from vaginal atrophy changes, please call our office at 602-625-0271 Ext. 112 and ask for Debbie to schedule an appointment.

Sincerely,

Vincent Luccaric, MD
Miss Murphy, MD
Sergey Eghorin, MD

The Monalisa Touch[™] has been used in over 15,000 women worldwide. It has FDA clearance and is indicated for atrophy, dryness, itching, irritation, incontinence and improvement of body self-image in medical specialties including gynecology and gynecobreast surgery.
