Valerie Schissler, CRNP

Dear Patient:

We are pleased to announce that The Institute for Female Pelvic Medicine is now offering a novel office-based laser therapy for the restoration of vaginal health.

MonaLisa Touch<sup>®</sup> is designed for postmenopausal women who are suffering from changes in their vaginal health such as vaginal dryness and painful intercourse. Women experiencing side effects as a result of a hysterectomy or breast cancer treatments can also benefit from MonaLisa Touch<sup>®</sup> laser therapy.

The MonaLisa Touch<sup>®</sup> delivers gentle fractional CO<sub>2</sub> laser to the vaginal wall tissue. It restores vaginal health by generating new collagen, elastin and vascularization.

- **3 treatments <5 minutes**
- **In office procedure**
- **Requires no anesthesia**
- **Extremely safe**
- **Symptom relief after just one treatment**
- **No downtime**
- **Thousands of women successfully treated since 2012**

If you are a breast cancer survivor, are peri or postmenopausal and are suffering from vaginal atrophic changes, please call our office at 610-435-9575 Ext 112 and ask for Debbie to schedule an appointment.

Sincerely,

Vincent Lucente, MD  
Miles Murphy, MD  
Sonya Ephraim, MD

The MonaLisa Touch<sup>®</sup> has been used in over 15,000 women worldwide. It has FDA Clearance and is indicated for incision, excision, ablation, vaporization and coagulation of body soft tissues in medical specialties including gynecology and genitourinary surgery.
