

The highest quality urological care delivered with compassion by the region's leading urological practice

## Innovative treatments, advanced technology

Through a network of 15 locations, including a single-specialty ambulatory surgery center, Robotic Surgery Institute and Advanced Prostate Cancer Clinic, COUG's board-certified urologists deliver care that sets the standard for quality in the region.

Established in 2004, Central Ohio Urology Group (COUG) provides a full suite of urological services and comprehensive individualized treatment for its patients, including men's health, women's health and cancer care.

We understand that urological and sexual health issues can range from embarrassing to painful and life threatening. We strive to make our patients feel comfortable, and to provide the information and options they need to make an informed choice.

In addition to its core urology and cancer care services, COUG provides a full complement of integrated urologic services, including in-house dispensary, radiology, pathology, radiation treatment, diagnostic imaging and lab.
